

Press Release

February 19, 2020
Abies Ventures, Inc.

Abies Ventures announces its investment in UltraSense Systems, Inc.

Abies Ventures, Inc. (Head Office: Tokyo, Japan; Managing Partner: Fuyuki Yamaguchi; hereafter, “Abies Ventures”) is pleased to announce that Abies Ventures Fund I, L.P. invested in UltraSense Systems, Inc. (hereinafter UltraSense) based in Silicon Valley, USA, the creator of touch user interface technology using 3D ultrasound for smartphones, cars, home appliances, IoT devices, medical devices, etc. This is a co-investment with a VC in Silicon Valley, which has expertise in this field, a world leading automotive supplier, a materials and an electronics company.

Abies Ventures is a venture capital that aims to discover startups possessing revolutionary high-level scientific or engineering technology (deep tech) that contribute to the advancement of human civilization and the realization of a sustainable world, and develop them into global companies.

UltraSense has succeeded in developing TouchPoint, the world's smallest ultrasonic sensor chip, that can perform high-precision sensing on any surface material such as metal and glass and thickness using proprietary ultrasonic technology. Since TouchPoint enables a smooth interface without buttons and a smart product design, it is already being evaluated by the world's leading smartphone manufacturers and is expected to be installed on smartphones to be sold this year.
